

INDEPENDENCE SEEKING "TEDDY" VISITS ARUBA

The doughty sailboat "TEDDY" on an Around-the-World cruise, nosed her silent way into San Nicolas Bay. Outside the reef the small boat attracted no more attention than any of the numerous others that plod their tedious way to and from. Inside the harbor, however, the Norwegian flag playing from the mast in the breeze bespoke of the independence that blest crew and craft. She was glorious with her air of importance.

The forty year old boat is thirty-nine feet long, fourteen feet wide, and draws seven and one half feet of water. The crew list shows Captain, Erling Tambs; First Mate, his wife, and young Tambs, aged five months, second mate. Without a doubt young junior is the youngest second mate on any ship.

The intrepid crew, which then consisted only of Captain and Mrs. Tambs, left Flekkefjord, Norway, August, 1928. It took them sixteen days to cross the North Sea during which the high seas and wind combined in administering a severe buffeting. Three weeks later they managed to hit the shores of Franco and from there they went to Cedeila. Again they were confronted with nasty weather. It became so bad that Captain Tambs was forced to throw out three anchors to keep his tiny craft from dashing to pieces on the rocks. He said that even with the help of the anchors, the boat kept dragging, and for a time he had visions of his trip being ended.

They then proceeded to Spain, and Carpana and thence to Lisbon where the boat was put in for repairs. "Teddy" had broken the main boom and most of the rigging had to be gone over to make her seaworthy once more. From Lisbon they proceeded to Madeira, and then to the Azores Islands where they made a stop of several months. It was there that the Second Mate received his commission.

NOVEMBER 17th IS CARNIVAL DAY

The popular saying, "It won't be long now" is about to come true once more. In one of our former issues, we announced that a real red hot Carnival would be held at the north-west corner of the Tank Farm on Sunday, November 17th. The purpose of the Carnival is to raise money for the next Athletic Meet in this manner, rather than by popular subscription.

From all advance indications, this Carnival is going to prove to be the real fun-maker of the season. There will be a lunch stand, selling the old standby of all such affairs, "hot dogs" and other forms of gastronomical achievements; two percentage wheels; bunco games; athletic show with wrestling, etc; cane and "whoopie" hat stand; candy booth with delicious sweets; a beer stand in case the customers should become thirsty, dance hall, and most important of all; a cashier's booth. These stands will all be grouped around the dance hall in the form of a horseshoe. Strip tickets will be sold for \$1.00 each, containing two 25¢, five 10¢ coupons, and two free chances on the grand prizes.

Free transportation will be provided both coming and going, dancing will be gratis, and the grand prizes are to be beautiful, elaborate and useful. First prize is to be an expensive Spanish Shawl. The other prizes have not been decided upon as yet, but rest assured, they will be well worth having.

If you are looking for a good time, and enjoy the care-free atmosphere surrounding every carnival, be there, and you will not be disappointed.

.....
It cost Bob Shawkey \$31.00 to get a telegram informing him that he had been picked as Manager of the Yankoes. The wire from the Club was sent collect to him in the wilds of Canada.

THE PAN-ARUBIAN

The PAN-ARUBIAN is by and for the Employees of the Pan American Petroleum Corporation, and affiliated Companies. It proposes to present the issues, not debate them; to publish news, not create it; and to make Aruba more enjoyable.

EDITORIAL COMMENT

BE POSITIVE

Two families live side by side. Outwardly there is not much difference in the inherent attributes of these neighbors. Mrs. Jones sees Junior pulling the cat's tail, and unauthoritatively says, "Don't do that, Junior." Mrs. Smith, next door, sees her Johnny using the embroidery scissors to cut out a tin propellor. "Use these scissors, Johnny, instead of those," handing him an old pair.

While this might be titled, "Why Mothers Turn Grey," yet there is more behind the remarks than the mere problems mothers face every day. Mrs. Jones left Junior without something to do. Junior will be found next morning making a tent of mother's lace curtain. Mrs. Smith gave Johnny a suggestion. One was a negative. The other was positive.

The reaction of the children to the two types of remarks is but a fore-runner of the reaction of children grown-up when they have more important problems. Billy Sunday packs them into his revival meetings because he is positive. Positiveness of another kind, is his. No doubting with him. Dr. Elliot of Harvard can't attract Sunday's enormous crowds to hear him preach on religion because he is not positive.

No scientific manner, hesitating, questioning, challenging has had much popularity with the masses.

Day after day we become more conscious of our ignorance. We understand mighty little about the world movements around us; we can but poorly comprehend the enormity of the star spaces above; few of us understand the depths of our own nature. Being conscious of our ignorance we seize upon a positive remark like a drowning man; we use it for a beacon to guide us from the fog.

Nature deals in positivistics. She has her laws, facts and substances. We may not understand the causes back of the laws governing electricity, motion or chemical affinity but the laws are as fixed and indubitable as granite.

There is a pleasure in thinking; questioning and doubt have their reward in the mind, but the thing we call efficiency is reserved for the man who can bunch his total energy into a clear belief and hurl himself solidly at a hesitating world.

And to the point, let us add ---
 Be Positive of Your Positiveness.

.....

The greatest mistake you can make in life is to continually fear you will make one.

.....

Wrap the girl friend up in the shawl you may win at the Carnival, and she'll be wrapped up in you.

GENERAL NOTICE:

Oct. 30, 1929

No automobiles or trucks will be allowed to enter any gate of the Refinery after 6:00 P.M. Saturday, November 2d, without an official wind-shield pass. These passes will be issued to all who have a right to them if they apply in person to Mr. H. M. Boshers. These passes will have to be fastened to the windshield with shellac. Shellac may be obtained at the Company Garage for this purpose.

(Signed) W. W. HOLLAND

RELIGIOUS SERVICES

Sunday School 10:00 A.M. at the School House. Every one invited.

Preaching at 7:30 P.M. in the Pan Am Mess Hall. There are a large number of new arrivals on the Island who are especially invited to come to Church Sunday evening. They can be assured of a non-denominational service with good music and a brief sermon. Pastor Jack Emery preaching.

AN APPRECIATION

Coming from the mother of R. B. Simpson, Jr., the following letter speaks volumes. It is addressed to Dr. Holland:

"I want to thank you most truly for your kind letter about my son. It reassures me even more than his own letters, for I know that he might make out his condition better than it was, so as to keep me from worrying.

He tells us of the good care he is getting, and of the skill of the Doctors, and I hope that he will soon be as well as before, and back at his work.

Please accept my gratitude for the good care of my boy, and for your own letter, that is much appreciated. I have often heard of the 'cold-bloodedness' of Corporation, but shall never believe it again."

(Signed)

ANNE O. SIMPSON

THE REWARD FOR KINDNESS

It was not kindness so much as love for a friend and fellow-workman that prompted the little which we, in Aruba, were able to do for Bob Nye during his illness and after his death.

Yet we have appreciations from Bob's wife and father and Mother, which exalt the few things that were done by his friends here. The letter follows:

"I wish to acknowledge your kind expression of sympathy to me in the loss of my husband, Robert Cleon Nye.

Words cannot express my feeling in this sad hour, but it is good to know that one has true friends who come forward to comfort one in sorrow."

(Signed) MRS. HELEN L. NYE

"Will you kindly convey to the fellow employees of our son, Robert C. Nye, our deep appreciation and sincere thanks for their many acts of kindness in connection with his illness and demise.

It is a comfort to know that even though he was far from home, he had many friends there, and received the best possible care.

(Signed) Mr. and Mrs. Gilbert Nye

FILM FIRE LOSS HEAVY

Oct. 24th: An explosion and fire destroyed the laboratories of the Consolidated Film Industries at Hollywood, Cal. with a loss estimated as high as \$50,000,000.

BANK ROBBED:

The First National Bank at Peru, Indiana was held up and robbed of \$50,000.

The robbers killed a policeman and a by-stander as they escaped.

The rainy season is upon us. It rained several hours Wednesday morning. The only ill-effects noted was that it brought out many mildewed raincoats at the lunch hour. These melted away, however, when the sun came smiling thru.

'AS WE GET IT'

PAGE 4.

A delightful Bridge party was held at Bungalow 32 Tuesday the 22d. Cards, music and dancing furnished a full evening of entertainment for the couples. H. E. Poole, Bill Rae, Jake Fortor, R. E. McGrow, Harry Gillis and Lylo Cook.

Mr. and Mrs. Daniel B. Irwin entertained a gathering of young men at their home Saturday night, Oct. 26th, the party being given in celebration of the birthday anniversary of Frank K. Perkins.

Mr. Perkins had a near-solo celebration in the early morning hours of the following day, which was the thirteenth monthly anniversary of the date of his arrival on the Island - probably just to show his contempt for the Number 13.

The party Saturday evening was attended by the entire Engineering Department, (including Mohamed, the blue print boy) who acted as chef and bottle drainer. Also three other men of our local camp, all of whom would, no doubt, make good engineers.

Another instance of the prevalent ailment - Bridge. This pleasant affair took place at Bungalow 180 Thursday, the 24th, attended by the following couples, represented here by the "head man" of each: Jack Rutz, R.E. McGrow, Harry Gillis, Al Palmer, Lylo Cook, Harmon Poole, Bill Rae and JAKE FORTER.

Mr. DeMILLE, PLEASE WRITE!

Talent of the most brilliant sort is frequently discovered in small towns and hamlets. Pick up any Movie Magazine, and you'll read about a great Movie Magazine discovering some beautiful Gloria Swanson pooling potatoes in a kitchen. Or a Mary Pickford serving "Ham-and" where-ever it is they serve "Ham-and."

We would like to call some Director's attention to Aruba. More particularly to an individual named English, whom we feel certain would be a big hit in the new Movies - with sound effects.

We say "hello" and "welcome" to recent Pan Aruba arrivals:

- *Vacationing in the States. Will return.

We've heard of floating a loan; of a floating banner, and of floating clouds. And yot of floating pudding, and floating kidneys. Now we have a brand new one - a floating island. The very latest rumor has it that Aruba is a floating island; on certain days it drifts away, so it is impossible to see South America. Then it floats back and lo, the mountains and shore line are plainly visible.

On those ought-of-eight days, we might suggest the gullibios travel to the north side of the island and look for Cuba or Florida. No harm in looking.

OF INTEREST TO "OIL" OF US

Following are some high spots in pipe line transportation of Crude Oil in the United States.

1. Approximately 99,000 miles of trunk and gathering lines, or enough to encircle the globe four times.
2. These lines handle one billion bbls of oil annually, enough to fill 12,500 80,000 barrel tanks. The local Chicago Bridge crew could construct those tanks in only 260 years.
3. The lines and equipment represent an investment of about \$3,500,000,000. There ain't that much money in the world.
4. These lines contain, at all times, approximately 18,000,000 barrels of crude. Make your own statistical observation.

"KOOL MOTOR" HAS HISTORY

The Tanker "KOOL MOTOR" which called here for a cargo last week, has an interesting history. Formerly called the "SHREVEPORT", this ship was proceeding up the Atlantic Coast, when a mechanic, using an electric torch in the hold, doing some repair work, caused an explosion to occur. Captain Simmons, now on another tanker, was first blown from the bridge and landed on another part of the ship, which blew up with a second explosion, throwing the Captain high (but not dry) into the water.

The crew escaped in life boats, while the vessel was towed into port by another ship which chanced along.

SEE US ABOUT THE FAMOUS MARQUETTE CARS

(Continued from Page 1)

It took them six weeks to come from the Canary Islands to Curaçao, and for forty days not a ship was seen. All this time Captain Tambs had been navigating by dead reckoning. He got his bearings from the first ship he had seen in forty days and after all this time of blind sailing, he was only 30 miles off his estimated course.

After leaving Curaçao, they made the short trip to Aruba where it was necessary to put the boat in our dry dock for repairs to the hull.

Captain Tambs, in an interview, said that his purpose in making the trip was to secure color for a novel he is writing, and also to secure technical information for articles on navigation. Aside from these purposes, his chief desire is to be the most independent man in the world, and he believes he has already achieved his aim by being King of his craft with the seven seas for a home.

From Aruba the cruise continues to Colon; from there it is undecided whether to proceed to the South Sea Islands and Australia or up the coast to Los Angeles and San Francisco, and then via the Pacific to the Orient.

Whichever course he decides upon, we wish Captain Tambs, his wife, his baby, and his boat, the best of luck. We take off our hats to a man with such daring and purpose of mind.

MASONIC DANCE - NOVEMBER 16

The last big Masonic Dance of the year, engineered by one of Aruba's most energetic Entertainment Engineers, Hugh MacPherson, will be held in the east wing of the Pan Am Moss-Hall on Saturday night November 16th, 1929.

This dance promises to be different from any preceding dance ever given on this island. "Its going to be our best" says Mac. Many of our Oranjestad friends are expected to augment the happy crowd from our own camp. Better take that Sunday suit out of the moth balls right away 'cause there's going to be a big time the 16th.

FUR FLYING IN TENNIS CHALLENGES

The following letter addressed to the Editor was received this week, and we publish it herewith for its stimulating effect on Inter-Department Tennis Competition:

"After having read the article in last week's PAN-ARUBAN by the gentleman of the Engineering Dept., in regard to an Inter-Department Tennis Tourney, we, the personnel of the Light Oils Department, heartily agree with the suggestion.

However, we disagree with him on one of his statements. We believe the old saying, "We're from Missouri" would adequately cover our feelings regarding the best team being in the Engineering Department.

However, if due to the lack of players, or any other reason, an Inter-Department elimination match cannot be arranged, we accept the challenge of the Engineering Dept. or any other Dept.

WE FEEL LUCKY."

(Signed)

LIGHT OILS

MRS. COOLIDGE'S MOTHER DIES

A little old lady who went to the White House in 1924 to see her son-in-law inaugurated President, has found release from two years illness. Her daughter, Mrs. Calvin Coolidge, was at the bedside when the end came. She spent two months at the White House after the inauguration and was actively interested in the lives of her distinguished kinsfolk.

She remained mentally active despite the infirmities of old age and illness. She was 80 years old.

LAKE MICHIGAN ON COSTLY SPREE

The pounding waters of Lake Michigan caused damage estimated between \$500,000 and \$1,000,000 along the strip of Lake shore drive fronting Lincoln Park in Chicago. The boulevard, battered for more than a mile, will be closed to traffic for six months and parts of it will have to be entirely rebuilt, it was announced.

ANOTHER PLANE ADDED TO ATLANTIC'S TOLL:

A bit of wave tossed black and orange painted wreckage report found in the North Atlantic brought apparent verification that another flight had failed. The bit of wreckage found floating is believed to have belonged to the plane in which Urban Ditsman, Jr., Montana cattleman attempted to bridge the Atlantic.

MAURETANIA SPEEDS UP

A new device has been introduced into the engine room of the MAURETANIA which, it is claimed, will increase the speed 2 1/2 knots per hour and reduce fuel consumption 5%. The Cunarder should be able to recapture the Atlantic Blue Ribbon for speed, which was taken from her recently by the BREMEN.

Transfusion of blood from a youth into the veins of an aged person has been successfully demonstrated in Venice, Italy, by Dr. Giocondo Protti, as a new means of rejuvenation.

JURY SAYS FALL "GUILTY"

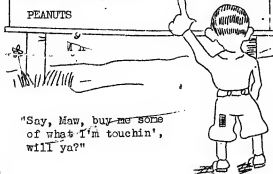

Albert B. Fall was found guilty of accepting a \$10,000 bribe from Edward L. Doheny for the lease of the Elk Hill California naval reserve. The jury recommended to the court that the former Secretary of the Interior be shown mercy. Eight men and four women composed the jury, which convicted the 68 year old man, now broken in health, of guilt in this connection while serving as Secretary of the Interior under the Harding administration.

PLOT AGAINST PRESIDENT'S SPECIAL TRAIN THWARTED.

An alleged plot to involve Pres. Hoover's special train in a wreck with a heavy sedan five miles north of New Albany, Indiana, was thwarted when three men removed the obstruction from the tracks about an hour before the train was due to pass.

SHOP TALK:

Have you ever noticed how people in various walks of life are absorbed in their work? Take, for instance, a farmer; given half a chance, and he'll talk "crops" till the cows come home. A Broker with less than half a chance, will discuss Stocks and Bonds. And an Actor talks plays until you want to ring down the curtain on him.

It is all perfectly natural, no doubt, this interest in one's business. Oil folk are no exception. In fact, if one may judge from appearances, they are a shade more interested in their occupation than others. They eat, drink and think oil constantly - bless their hearts. Ask any Oil-man's wife. She'll tell you how her smartest dinner parties have been turned into Oil-orgies.

With all this enthusiasm, is it any wonder the Oil Industry is such a tremendous business?

MENTAL SUGGESTION

Much may be said of mental suggestion. A man, standing on shore, can watch the rolling sea, and imagine himself sea-sick. Another, previously in perfect health, becomes quite bilious just listening to the aches and pains of an ailing friend.

Oh, this thought stuff is deep. We draw an example of it right in our midst. Recently Jim MacEachern was asked to deliver a new cock-tail shaker to a friend. Jim insists the cocktail shaker was brand new--that it never had been used, yet it so affected him that he fell out of his car, and badly dented--the cocktail shaker.

In falling, Jimmy dropped a ten guilder note which change he had been holding. The wind blew it away. It is not known whether the cocktail shaker was still responsible for Jim's actions, but he took out another note, released it in the wind, believing it would blow to where the first one went. Away it sailed--no doubt to the same place its predecessor went, but with such speed that Jim didn't see the direction it took.

It was a strong East wind which did the blowing, and the notes "went west" explained Jim.

LIFE

We reprint the following dissertation from Walworth's Kewanee Craftsman.

Man comes into the world without his consent, and leaves it against his will. During his stay on earth, his time is spent in one continuous round of contraries and misunderstandings. In his infancy he is an angel. In his boyhood he is a devil. In his manhood he is everything from a lizard up. In his duties he is a damned fool. If he raises a check he is a thief, and the law raises hell with him. If he is a poor man, he is a poor manager, and has no sense. If he is rich, he is dishonest and considered smart. If he is in politics, he is a grafter and a crook. If he stays out of politics, you can't place him as he is an "Undesirable Citizen." If he goes to church, he is a hypocrite. If he stays away from church, he is a sinner. If he donates for foreign missions, he does it for show; if he doesn't, he is "stingy" and a tightwad. When he first comes into the world, everybody wants to kiss him--before he goes out they want to kick him. If he dies young, there was a great future before him. If he lives to a ripe old age, he is in the way--only living to save funeral expenses.

What's the use.

OPEN SEASON ON THESE

Aruba, it would seem, is almost entirely without wild game of any sort. Still there are a few things one would like to go gunning for. Let's declare it open season on the following:

The goats that holler under your window at day break.

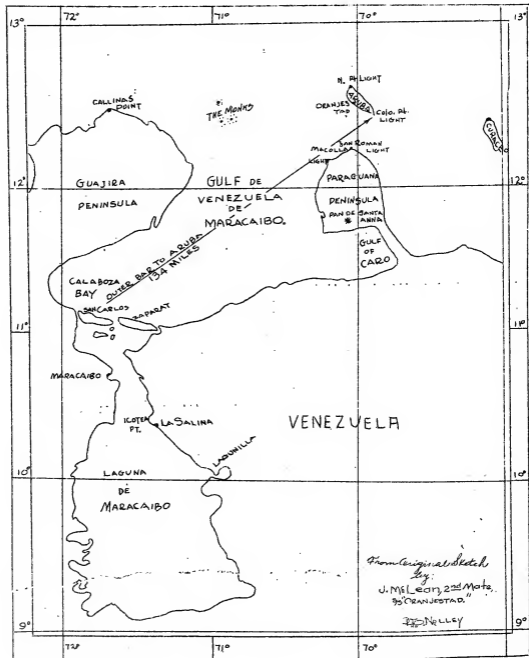

Your neighbor's parrot which squawks all the time.

The fellows who noisily insist upon visiting you at 2 A. M.

The driver of the car which nearly runs you down as you hurry to work, but who won't stop to give you a lift.

The fellow who boasts of drawing to a three-card flush.

The guy who did such big things back in the States--but seems to have lost the knack now that he's come to Aruba. This guy shoots the bull so much he almost believes his own stories, and its time something was done about it.
